

TORRPEDDO PROJECT BOOK

Executive Summary

Torrpeddo is an industrial-grade, premium torrent client designed for the modern desktop. Built primarily with Python and the Electron framework, Torrpedito leverages the powerful `libtorrent` suite to offer a seamless, high-performance experience that bridges the gap

between complex network protocols and professional user interfaces.

Architectural Deep Dive

Torpeddo follows a decoupled architectural pattern, separating the presentation layer from the core logic and network engine. This is achieved through three primary layers:

1. Frontend: Electron Framework

****What is**

****Benefits for Torpeddo:****

- ****Visua**
to create a

2. The Bridge: IPC (Inter-Process Communication)

****What is**

****Implementation: Secure JSON-RPC****

Communic

****Why this approach?****

- ****Decoupling**
touching the

3. Backend Engine: Python & libtorrent

****The Core**
